

## Cell Test Study Guide

1) What are the 3 parts of the cell theory?

9) Endoplasmic Reticulum

2) Who was the first scientist to see tiny moving things in pond water?

10) Mitochondria

3) Who was the first scientist to use the term 'cell'?

4) Who was the first scientist to notice that both plants and animals are made of cells?

11) Golgi Body

5) Who was the first scientist to notice that all parts of plants are made of cells?

6) Who was the first scientist to write the 3 parts of the cell theory?

12) Nucleus

**Draw a diagram for the following cell parts and write a brief description about what it does for the cell:**

7) Cell Membrane

13) Ribosome

8) Chloroplast

14) Vacuole

15) In the space below draw and label a diagram of an animal cell:

16) In the space below draw and label a diagram of an animal cell:
